

In 1964, of the more than 85 million telephones in the United States and Canada, less than one percent were used regularly by deaf people. In that same year, three enterprising deaf men, Robert H. Weitbrecht, James C. Marsters, and Andrew Saks, started the process that led to deaf people around the world possessing an affordable phone system that they could use. Harry Lang's *A Phone of Our Own: The Deaf Insurrection Against Ma Bell* tells how these three men collaborated to solve the technical difficulties of developing a coupling device for TTYs that would translate sounds into discernible letters. More remarkably, and with the help of an expanding corps of Deaf advocates, they successfully assaulted the American Telephone and Telegraph Company (AT&T), which in its efforts to protect its monopoly, smashed old TTYs to keep them from being used for potentially competitive purposes. *A Phone of Our Own* is an entertaining and engrossing story of how Deaf people fought and won, and changed the world for the better for deaf people everywhere.

Long Live America! Strategies, Common Views & Beliefs, History of European Liberalism(Chinese Edition), Alterman Gambit Guide: White Gambits (The Alterman Gambit Guide), Fenton Glass Compendium 1940-7 (1940-1970), Rodoryoku mondai to ringyo mokuzai sangyo (Midori no bukkuretto) (Japanese Edition), Early Years Observation and Planning in Practice, Perfection, Here Come the Brides, Public Administration in Theory and Practice, 2nd edition.[Paperback,2010],

I am not sure where I thought the textphone (minicom) came from. It is one of those objects so well suited to its purpose and such a part of everyday life that I took.
